PROFESSIONAL SUMMARY

Software Engineer with an M.S. in Computer Science and experience developing Java/Spring Boot backend services, REST APIs, automation workflows, and cloud-deployed applications. Hands-on experience with Java, Python, SQL, PostgreSQL, Docker, AWS EC2, and Linux. Experienced in backend data processing, infrastructure automation, debugging, and building reliable software workflows across application and infrastructure environments.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, C/C++
- **Backend:** Spring Boot, REST APIs, Java Streams, JSON, Bash
- **Databases:** PostgreSQL, SQLite
- **Cloud & DevOps:** AWS EC2, Docker, Linux, Git, GitHub, Ansible
- **Automation & Integration:** n8n, Webhooks, OAuth 2.0, Gmail API
- **Messaging & Protocols:** MQTT, HTTP/HTTPS, TCP/IP, SNMP
- **Tools:** Postman, VS Code, Nginx
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Design

PROFESSIONAL EXPERIENCE

Software Developer, Fuge Technologies — May 2024 – Sep 2025

- Developed and maintained RESTful APIs using **Java and Spring Boot** to process virtual machine and infrastructure data, supporting 10+ automated workflows.
- Built backend features using Java Streams and optimized data-processing logic, **reducing response times by 15%** for routine operations.
- Deployed and maintained applications on **AWS EC2 using Docker**, improving deployment consistency and reducing manual setup effort by **40%**.
- Debugged application behavior and backend processing issues using logs, API testing, and systematic troubleshooting.

Network Engineer, Purdue University — Jan 2023 – Dec 2023

- Developed Python-based automation for firmware deployment across **800+ enterprise network devices**, reducing manual upgrade effort and improving deployment consistency.
- Automated network operations using scripting and Ansible while validating deployment status and troubleshooting failed deployments.
- Supported enterprise infrastructure through network monitoring, troubleshooting, security updates, and root-cause analysis.
- Worked with cross-functional teams to maintain reliable network and cloud infrastructure.

PROJECTS

AWS n8n Lead Automation System | GitHub

AWS EC2 | Docker | Linux | REST/Webhooks | Gmail API | OAuth 2.0

- Deployed a cloud-based workflow automation platform on AWS EC2 using Docker and Ubuntu Linux.
- Built webhook-driven workflows for automated lead processing and event-triggered workflow execution.
- Integrated Gmail through Google OAuth 2.0 for automated email processing and notifications.
- Configured persistent Docker-based deployment and managed the application remotely using SSH.

ESPForge — OTA Firmware Management Platform | GitHub

ESP32 | FreeRTOS | MQTT | OTA | Cloud Dashboard

- Engineered Wi-Fi-enabled ESP32 software for remote OTA upgrades, watchdog-based recovery, and live device telemetry.
- Integrated FreeRTOS task orchestration with MQTT messaging for deployment pipelines and remote maintenance.
- Designed a cloud dashboard supporting firmware version management, update triggering, and node status tracking.

Enterprise Network Automation | Purdue University

Python | Ansible | SNMPv3 | GitLab CI | HTTPS | Cisco IOS XE

- Developed Python automation for migrating Cisco IOS devices to SNMPv3 and improving monitoring and configuration workflows.
- Built Ansible automation for IOS XE upgrades, deployment validation, logging, and operational monitoring.
- Performed debugging, log analysis, testing, and root-cause analysis across an enterprise environment of 800+ network devices.

EDUCATION

Postgraduate Diploma in Embedded Systems Design — **Sep 2025 – Jul 2026**
BICARD Institute, Pune

Master of Science in Computer Science — **Jan 2022 – Dec 2023**
Purdue University, Fort Wayne, Indiana

Bachelor of Engineering in Computer Engineering — **Aug 2016 – Aug 2019**
Pune University, Pune, India
